Core Competencies

Skill	Level	Details
AngularJS (1.x)	Advanced	Strong working knowledge of Angular.js and its core ideas - Single Page Application (SPA) framework, two-way data binding, Model-View-Whatever (MVW) paradigm.
JavaScript	Advanced	Certainly competent, but not a JS ninja.
Perl 5	Advanced	One of my favorite languages. Roughly five years of experience spent writing Perl 5 scripts for both Windows and Unix/Linux systems.
RESTful API Development	Intermediate	Helped build several RESTful APIs predominately with Ruby on Rails, though some minimal experience with Node.js
HTML5 & CSS3	Intermediate	Used extensively and generally competent, but still have days where nothing seems to line up right.
Bootstrap 3.x	Intermediate	Loved or hated, Bootstrap helps us graphically-challenged developers make things look pretty.
Ruby on Rails	Intermediate	Written a fair amount of Ruby code in the Rails framework and have experience with gem installation, Rake, ActiveRecord, routes, etc... But still plenty to learn.
Git	Intermediate	Comfortable with general Git usage including branching, merging, pull requests, etc... Not an expert, but with Google's help generally able to solve any Git task.
Node.js	Novice	Mostly personal, home-based project experience. But learning quickly and really enjoy using Node's rapid development capabilities.

Honorable Mentions

MySQL, Highcharts and HighStock, Apache, IIS, MongoDB, D3 Visualization Library

English - Fluent, Spanish - Intermediate, Russian - Basic

Employment History

Visa Inc., Highlands Ranch, CO

August 2015 - Present

Sr. Web Engineer

Mix of full-stack and strict front-end web development using AngularJS, Ruby on Rails, and MySQL for three different medium-scale web applications.

- Heavy use of open source JavaScript libraries including: AngularJS, jQuery, Angular UI, UI Router, and more.
- Build responsive and consistent UI layouts using Bootstrap and Bootstrap-based themes such as SmartAdmin and Inspinia.
- Develop RESTful API using Ruby on Rails, consumed on the front-end [mostly] using AngularJS Resource objects.
- Agile development model using Git, Stash/Bitbucket, and Jira. Most releases based on 2-3 week sprints.

Consultant Specialists Inc., Highlands Ranch, CO

March 2014 - July 2015

Contractor / Web Developer

Initially contracted with Visa Prepaid developing web services written in C# using XML payloads. Latter 10 months, moved to full-stack AngularJS, Ruby on Rails, and MySQL web application.

- Learned AngularJS and Ruby on Rails on the job. Became proficient in both within a month.
- Began using tools such as Git, Stash, and Jira in an Agile based development project.

Visa Inc., Highlands Ranch, CO

June 2004 - November 2012

Sr. Systems Administrator

Lead the Windows automation team for Visa's operations department. Administered the source code repositories and defect tracking systems for Visa's software development teams using IBM/Rational ClearCase and ClearQuest.

- Wrote server-side automation scripts using Perl, C# and Java – Some driven by the server scheduler, others driven by HPOO.
- Specialized in system monitoring and data gathering to provide usage metrics for servers and applications.
- Automated solutions allowed for over 50% of all help desk tickets to be completed automatically without human intervention.

Activities

American Corporate Partners (ACP)

January 2016 - Present

Volunteer Mentor

ACP is a service organization "Connecting US Veterans to Business Leaders through Mentorships and Online Career Advice."
